**Factors which are material for the purpose of assessing the market risks associated with Bond:**

The Bonds may not be a suitable investment for all investors. Each potential investor in the Bonds must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Bonds, the merits and risks of investing in the Bonds and the information contained or incorporated by reference in this Securities Note and/or Registration Document or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Bonds and the impact the Bonds will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Bonds, including where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Bonds and be familiar with the behaviour of the financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

**Modification and Waiver**

The conditions of the Bonds contain provisions for calling meetings of bondholders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all bondholders including bondholders who did not attend and vote at the relevant meeting and bondholders who voted in a manner contrary to the majority.

The conditions of the Bonds also provide that the Bond Trustee may:

except as provided for in Bond Agreement clause 17.1.5, reach decisions binding for all Bondholders concerning the Bond Agreement, including amendments to the Bond Agreement and waivers or modifications of certain provisions, which in the opinion of the Bond Trustee, do not have a Material Adverse Effect on the rights or interests of the Bondholders pursuant to the Bond Agreement.

except as provided for in the Bond Agreement clause 17.1.5, reach decisions binding for all Bondholders in circumstances other than those mentioned in the Bond Agreement clause 17.1.3 provided prior notification has been made to the Bondholders. The Bond Trustee may not reach a decision binding for all Bondholders in the event that any Bondholder submits a written protest against the proposal within a deadline set forth in the Bondholder notification.

not reach decisions pursuant to the Bond Agreement clauses 17.1.3 or 17.1.4 for matters set forth in the Bond Agreement clause 16.3.5 except to rectify obvious incorrectness, vagueness or incompleteness.

not adopt resolutions which may give certain Bondholders or others an unreasonable advantage at the expense of other Bondholders.

## 1 Risk Factors

Investing in bonds issued by Kongsberg Gruppen ASA (the “Issuer”) involves inherent risks. Prospective investors should consider, among other things, the risk factors set out in the Prospectus, including those related to the Issuer as set out in the Registration Document, before making an investment decision. The risks and uncertainties described in the Prospectus, including those set out in the Registration Document, are risks of which the Issuer is aware and that the Issuer considers to be material to its business. If any of these risks were to occur, the Issuer’s business, financial position, operating results or cash flows could be materially adversely affected, and the Issuer could be unable to pay interest, principal or other amounts on or in connection with the bonds. Prospective investors should also read the detailed information set out in the Registration Document dated 8 November 2016 and reach their own views prior to making any investment decision.

### **Risk related to the market in general**

All investments in interest bearing securities have risk associated with such investment. The risk is related to the general volatility in the market for such securities, varying liquidity in a single bond issue as well as company specific risk factors. There are three main risk factors that sum up the investors’ total risk exposure when investing in interest bearing securities with a fixed interest rate: liquidity risk, settlement risk and market risk (both in general and issuer specific).

Liquidity risk is the risk that a party interested in trading bonds cannot do it because nobody in the market wants to trade the bonds. Missing demand for the bonds may result in a loss for the bondholder.

The price of a single bond issue will fluctuate in accordance with the interest rate and credit markets in general, the market view of the credit risk of that particular bond issue, and the liquidity of this bond issue in the market. In spite of an underlying positive development in the Issuers business activities, the price of a bond may fall independent of this fact.

The Loan has been established at a fixed rate, and consequently the coupon doesn’t vary with changes in interest rate levels. Investment in bond loans bearing interest at a fixed rate involves the risk that subsequent changes in market interest rates may adversely affect the value of the Loan.

Settlement risk is the risk that the settlement of bonds does not take place as agreed. The settlement risk consists of the failure to pay or the failure to deliver the bonds.

Market risk is the risk that the value of the bonds will decrease due to the change in value of the market risk factors. The price of a single bond issue will fluctuate in accordance with the interest rate and credit markets in general, the market view of the credit risk of that particular bond issue, and the liquidity of this bond issue in the market. In spite of an underlying positive development in the Issuers business activities, the price of a bond may fall independent of this fact. Bond issues with a relatively short tenor and a floating rate coupon rate do however in general carry a lower price risk compared to bonds with a longer tenor and/or with a fixed coupon rate.

No market-maker agreement is entered into in relation to this bond issue, and the liquidity of bonds will at all times depend on the market participants view of the credit quality of the Issuer as well as established and available credit lines.
