

The applicable KSAT price list for RISAT-1 Data Products is presented below. The list also includes NRT delivery and rapid tasking fees. Please note that the list **excludes all taxes**.

**RISAT-1 Full-Resolution Data**

Satellite	Modes	Resolution	Scene Size	Timing	Price (USD)
RISAT-1	Coarse Resolution ScanSAR (CRS) <sup>1</sup>	Up to 50 meters	220 km width	Non-NRT <sup>2</sup>	\$1,320
RISAT-1	Medium Resolution ScanSAR (MRS)	Up to 25 meters	115 km width	Non-NRT	\$1,320
RISAT-1	Fine Resolution Stripmap (FRS-1) <sup>3</sup>	Up to 3 meters	25 km width	Non-NRT	\$1,680
RISAT-1	Fine Resolution Stripmap (FRS-2) <sup>4</sup>	Up to 9 meters	25 km width	Non-NRT	\$1,680

<sup>1</sup> - RISAT-1 ScanSAR modes are available in single, dual, and a unique circular polarization.

<sup>2</sup> - KSAT defines NRT as less than 120 minutes from the time of satellite imaging to delivery of outputs by KSAT. Scenes ordered with NRT delivery which are not delivered in less than 120 minutes will revert to ‘non-NRT’ pricing.

<sup>3</sup> – “FRS-1” is a traditional StripMap approach and is available in single, dual, and a unique circular polarization.

<sup>4</sup> - “FRS-2” contains quad polarization capability.

**RISAT-1 Near Real-Time (NRT) Delivery**

The fee associated with global near-real time delivery of images in less than 120 minutes is presented in the table below. Scenes ordered with NRT delivery which are not delivered in less than 120 minutes will revert to ‘non-NRT’ pricing.

Satellite	Available Modes	Delivery Timing	Price (USD)
RISAT-1	All Modes	< 120 Minutes	+ \$500 per scene (in addition to scene price)

**RISAT-1 Rapid Tasking Fees**

RISAT-1 standard tasking is 3 days in advance of satellite acquisition. KSAT is able to offer a fast-tasking option for orders placed with 2 days advance notice on a best-effort basis. The additional incremental charge for these orders is in addition to the scene price.

Satellite	Tasking Level	Timing	Price (USD)
RISAT-1	“Fast”	2 days prior to submission deadline	+ \$400 per scene (in addition to scene price)

## RISAT-1 Cancellation Policy and Fees

Cancelled orders carry a non-trivial operational burden at KSAT, including sub-optimal antenna scheduling and wasted order desk labor. Therefore, all cancelled orders carry a minimum fee, regardless of lead time. Orders cannot be cancelled later than 3 days before acquisition.

Satellite	Cancellation Timing	Price (USD)
RISAT-1	> 3 days before acquisition	\$400
RISAT-1	< 3 days before acquisition	Not Possible – full image price charged

## RISAT-1 Archive Data

### KSAT Archive

KSAT retains a small but growing archive of RISAT-1 Data Products. These are classified as “Archive” products 30 days after acquisition and priced at 50% off the prices listed in the “Full Resolution Data” table above.

### ANTRIX Archive

In addition, ANTRIX, maintains an archive of RISAT-1 Data Products (primarily acquisitions in India). The price list below presents the product prices for delivery of archived RISAT-1 data products from the ANTRIX archive.

Satellite	Modes	Resolution	Scene Size	Timing	Price (USD)
RISAT-1	Coarse Resolution ScanSAR (CRS) <sup>1</sup>	Up to 50 meters	220 km width	Non-NRT	\$1,285
RISAT-1	Medium Resolution ScanSAR (MRS)	Up to 25 meters	115 km width	Non-NRT	\$2,215
RISAT-1	Fine Resolution Stripmap (FRS-1) <sup>3</sup>	Up to 3 meters	25 km width	Non-NRT	\$1,875
RISAT-1	Fine Resolution Stripmap (FRS-2) <sup>4</sup>	Up to 9 meters	25 km width	Non-NRT	\$3,640
